

Directive	Chrome	IE	Description
no-referrer	Y	N	Referrer header is omitted; sent requests do not contain this information
no-referrer-when-downgrade	Y	N	Origin, path and querystring in Referer will be sent only if the security quality remains the same or improves (HTTP -> HTTPS)
strict-origin	Y	N	Only sends the origin when the protocol security level remains the same (HTTPS -> HTTPS)
strict-origin-when-cross-origin	Y	N	Sends all info for same-origin requests; cross-origin requests will only have origin info sent if the security quality remains the same
same-origin	Y	N	Sends all info for same-origin requests; cross-origin requests will not send a referrer header
origin	Y	N	Only sends the origin
origin-when-cross-origin	Y	N	Sends full message for same-origin requests at the same protocol level. Otherwise only send origin for cross origin requests and requests to less secure destinations
unsafe-url	Y	N	Sends all informations regardless of security
